Volume 14 (1988)

Bernussou, J., *see* ElSayed, H.M., (1) 65–74
Bilal, A.Y., *see* ElSayed, H.M., (1) 65–74
Bitsoris, G., On the linear decentralized constrained regulation problem of discrete-time dynamical systems, (3) 229–240
Borne, P., *see* Richard, J.P., (3) 241–252
Burns, J.R. and J.D. Morgeson, A methodology for formulation of knowledge-based simulation models, (1) 15–30
Chen, C., *see* Yang, J.-B., (4) 275–288
D'Andrea, B. and J. Levine, Synthesis of nonlinear state feedback for the stabilization of a class of manipulators, (3) 145–168
ElSayed, H.M., M.S. Mahmoud, A.Y. Bilal and J. Bernussou, Adaptive alternate-routing in telephone networks: Optimal and equilibrium solutions, (1) 65–74
Farrell, J.A., *see* Michel, A.N., (3) 169–194
Gentina, J.C., *see* Richard, J.P., (3) 241–252
Grujić, Lj., *see* Shaaban, H., (3) 213–228
Hammond, K.R., Judgment and decision making in dynamic tasks, (1) 3–14
Kamoun, M. and A. Titli, Parametric identification of large scale discrete time systems, (4) 289–306
Kanellakis, A., *see* Tzafestas, S.G., (3) 195–212
Kastner, M.P., *see* Pattipati, K.R., (1) 45–64
Levine, J., *see* D'Andrea, B., (3) 145–168
Lin, J., Z. Liu, B. Wan and P.D. Roberts, Modified partial duality theorem and gradient shift coordination method, (4) 253–274
Liu, Z., *see* Lin, J., (4) 253–274
Mahmoud, M.S., *see* ElSayed, H.M., (1) 65–74
Michel, A.N., J.A. Farrell and W. Porod, Qualitative analysis of neural networks, (3) 169–194
Morgeson, J.D., *see* Burns, J.R., (1) 15–30
Narahari, Y., *see* Viswanadham, N., (2) 125–142
Osiadacz, A.J. and M.A. Salimi, Comparison between sequential and hierarchical simulation of gas networks. Part 1: Dynamic simulation of gas flow in a single pipe, (2) 77–98
Osiadacz, A.J. and M.A. Salimi, Comparison between sequential and hierarchical simulation of gas networks. Part 2: Dynamic simulation of flow of gas in networks, (2) 99–124
Pattipati, K.R. and M.P. Kastner, A hierarchical queueing network model of a large electronics test facility, (1) 45–64
Porod, W., *see* Michel, A.N., (3) 169–194
Rege, K.M., Approximate analysis of serial manufacturing lines with buffer control, (1) 31–44
Richard, J.P., P. Borne and J.C. Gentina, Estimation of stability domains by use of vector norms, (3) 241–252
Roberts, P.D., *see* Lin, J., (4) 253–274
Salimi, M.A., *see* Osiadacz, A.J., (2) 77–98
Salimi, M.A., *see* Osiadacz, A.J., (2) 99–124
Shaaban, H. and Lj. Grujić, New decomposition–aggregation scheme for transient stability analysis of power systems, (3) 213–228
Theodorou, N., *see* Tzafestas, S.G., (3) 195–212
Titli, A., *see* Kamoun, M., (4) 289–306
Tzafestas, S.G., N. Theodorou and A. Kanellakis, Recent advances in the stability analysis of multidimensional systems, (3) 195–212
Viswanadham, N. and Y. Narahari, Stochastic Petri net models for performance evaluation of automated manufacturing systems, (2) 125–142
Wan, B., *see* Lin, J., (4) 253–274
Xi, Y.-G., *see* Xu, X.-M., (4) 307–322
Xu, X.-M., Y.-G. Xi and Z.-J. Zhang, Decentralized predictive control (DPC) of large scale systems, (4) 307–322
Yang, J.-B., C. Chen and Z.-J. Zhang, The interactive decomposition method for multiobjective linear programming and its applications, (4) 275–288
Zhang, Z.-J., *see* Xu, X.-M., (4) 307–322
Zhang, Z.-J., *see* Yang, J.-B., (4) 275–288
